 (Chapter - 3) (Synthetic Fibres and Plastics)
 (Class - 8)

Exercises

Question 1:
 Explain why some fibres are called synthetic.

Answer 1:
 Some fibres which are not natural (man-made fibres) called synthetic because they are made by chemical processing of petrochemicals. The synthetic fibres are made up of very large units called polymers. Some of the synthetic fibres are rayon, nylon and acrylon.

Question 2:
 Mark (✓) the correct answer:
 Rayon is different from synthetic fibres because
 (a) it has a silk like appearance
 (b) it is obtained from wood pulp
 (c) its fibres can also be woven like those of natural fibres

Answer 2:
 (b) it is obtained from wood pulp

Question 3:
 Fill in the blanks with appropriate words:
 (a) Synthetic fibres are also called _____ or _____ fibres.
 (b) Synthetic fibres are synthesised from raw material called _____.
 (c) Like synthetic fibres, plastic is also a _____.

Answer 3:
 (a) Synthetic fibres are also called **man-made** or **artificial** fibres.
 (b) Synthetic fibres are synthesised from **raw** material called **petrochemicals**.
 (c) Like synthetic fibres, plastic is also a **polymer**.

Question 4:
 Give examples which indicate that nylon fibres are very strong.

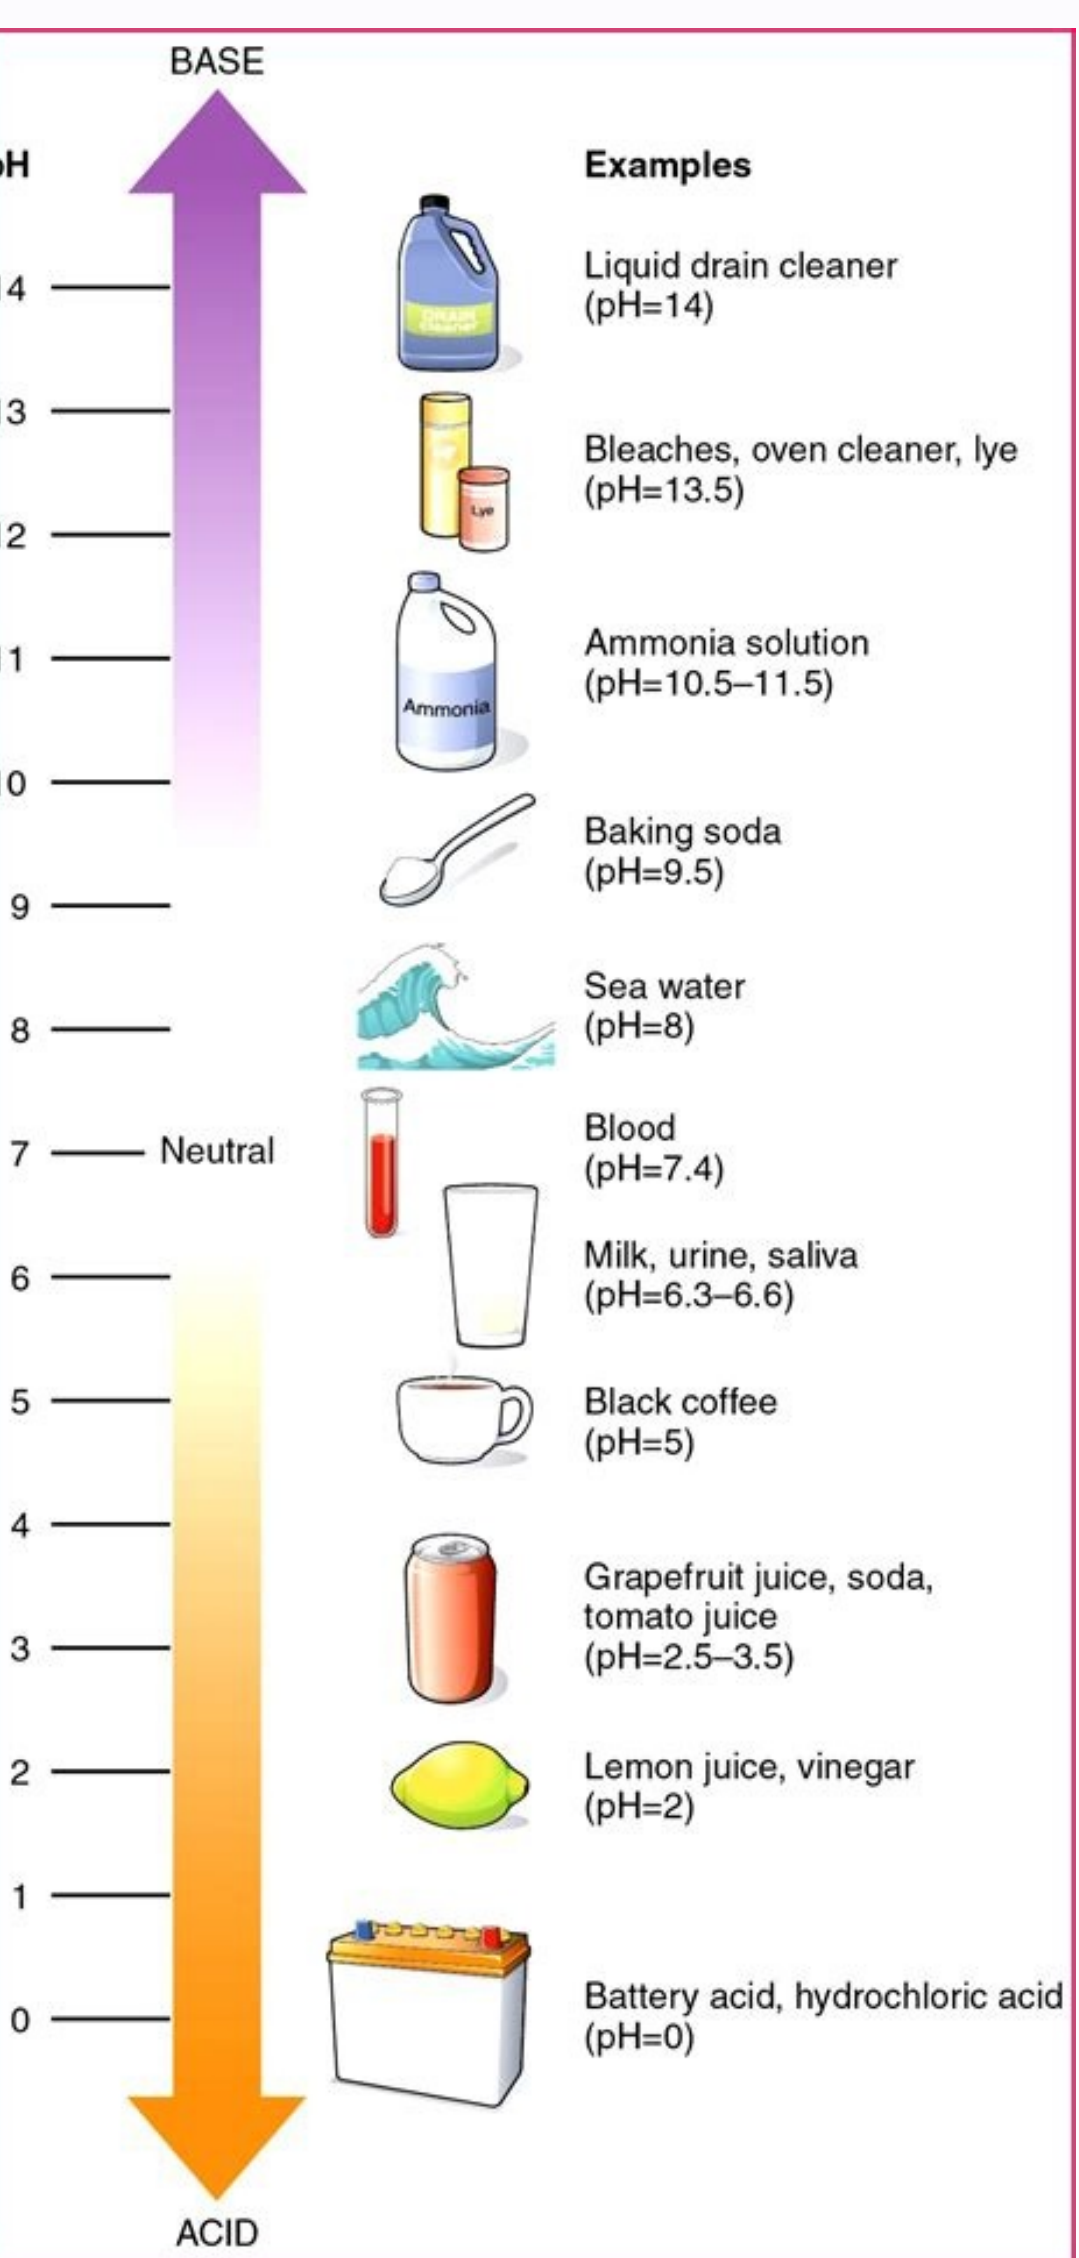

Answer 4:
 Nylon is a very strong fibre that is why nylon is used for making parachutes, rock climbing ropes, fishing nets seat belts etc. A nylon thread is elastic and light but actually stronger than a steel wire.

Question 5:
 Explain why plastic containers are favoured for storing food.

Answer 5:
 Plastic containers are favoured for storing food for the following reasons:
 > Plastic containers are light weight so they are easy to handle.
 > The price of plastic containers is very less as compared to other containers.
 > They have good strength.
 > Plastic containers are durable.

Question 6:
 Explain the difference between the thermoplastic and thermosetting plastics.

Answer 6:
 Difference between the thermoplastic and thermosetting plastics:
